Capgemini invent

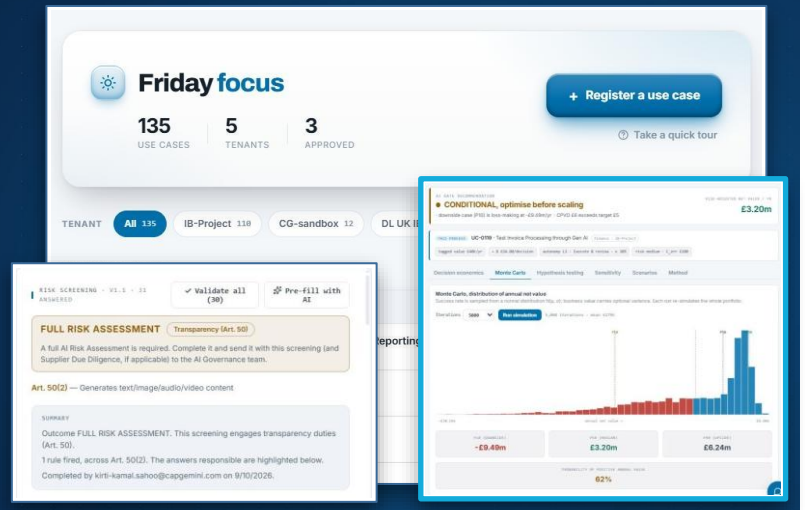

4SIGHT.AI

Proving which AI investments actually deliver.

VALUE • RISK • EVIDENCE

One governed workspace from AI idea to proven value

Intake, prioritise, screen and validate every AI use case — then track the value it really delivers, in one record.

95%
of GenAI pilots show no measurable P&L impact[1]

30%
of GenAI projects abandoned after proof of concept[2]

€35M / 7%
maximum EU AI Act fine — of global annual turnover[3]

THE SOLUTION

A value-first governance platform for enterprise AI

01 VALUE-FIRST PRIORITISATION
Value × feasibility scoring, ROI and KPI baselines

02 COMPLIANCE BY DESIGN
EU AI Act screening and supplier due diligence

03 EVIDENCE-BASED DECISIONS
Simulator, Monte Carlo & hypothesis tests

04 PROVEN VALUE
KPI and ROI tracked from approval to delivery

LIVE TODAY

135 use cases · 357 KPIs · £59.9M annual value under governance across 5 tenants — every decision audit-ready.

HOW IT WORKS

1. **REGISTER** — Intake or Excel
2. **PRIORITISE** — Value × feasibility
3. **GOVERN** — Screening & gates
4. **VALIDATE** — Decision simulator
5. **PROVE** — KPI & ROI tracking

DIFFERENTIATED CAPABILITIES

Microsoft SSO • Multi-tenant RBAC • AI drafts, rules decide • Agentic pattern advisor • Board pack in one click • Every AI call metered and audited.

TRUDATA

Self-healing master data, with a human in charge.

DETECT • HEAL • GOVERN

One platform from failed value to trusted data

Sits alongside your MDM and data quality tools, proposes evidence-backed fixes and keeps a steward in charge of every change.

≈ 2 hrs
spent today investigating each failed value[1]

–80%
data steward effort, reduction in FTE

Minutes
to answer a new quality question, not 3–5 days[2]

THE SOLUTION

An agentic AI layer for self-healing master data

01 **AGENTIC SELF-HEALING**
Agents detect, enrich and propose cited fixes

02 **HUMAN IN CONTROL**
Every change approved, and reversible

03 **EXPLAINABLE BY DESIGN**
Rule broken, source and confidence on every fix

04 **DATA PULSE**
Plain-English questions, instant charts

IN DELIVERY

Three scopes in build for a global supply chain hub: self-healing, data definition and quality reporting, on Azure.

HOW IT WORKS

1 **INGEST** DQ extract, ADM › 2 **DETECT** Rules + graph › 3 **PROPOSE** Cited fixes › 4 **APPROVE** Steward decides › 5 **PROVE** Accuracy & KPIs

DIFFERENTIATED CAPABILITIES

Sits alongside existing MDM • No write-back to source • Approval and rollback on every fix • Knowledge-graph reasoning • Plain-English rules • Every AI call audited.

EDGECRAFT

Build your own vision model with your real domain data.

BUILD • OPTIMISE • DEPLOY

From use case to edge AI model in hours, not months

Domain experts describe the problem, generate and label data, then train, optimise and package a model for their own edge hardware.

8–16 wks
to get one vision model onto an edge device today

48%
of AI projects ever reach production

80% lower
cost to build a pilot-ready vision model

THE SOLUTION

A no-code crafting machine for edge vision intelligence

01 **NO-CODE FOR DOMAIN EXPERTS**
AI-guided workflow, no data scientist needed

02 **DATA BLOCKERS REMOVED**
Synthetic images, AI auto-labelling and AutoML

03 **HARDWARE-AWARE BY DESIGN**
Quantised per target device, no manual porting

04 **PROVEN ON DEVICE**
Sandbox tests on your own paired Jetson

LIVE TODAY

Live in Azure. 10+ Vision Models available in Marketplace, all built using the platform within a few days. Nvidia Jetson devices available for live testing of model via the Sandbox

HOW IT WORKS

1 **DEFINE** Need & hardware › 2 **DATA** Generate & label › 3 **TRAIN** Manual or AutoML › 4 **OPTIMISE** Quantise per device › 5 **DEPLOY** Test & package

DIFFERENTIATED CAPABILITIES

Build models in days not weeks • No ML background required • Generate and label synthetic images • Compress models for reducing latency • Test models directly on edge Jetson device

SPECIALIZED SOVEREIGN INTELLIGENCE

Domain Focused SLMs enabling Local Intelligence with Zero Token cost

SPECIFIC • SOVEREIGN • EFFICIENT

Maximising performance per watt and minimising cost per query

Fully local air gapped small models specialized in domain focused tasks, cutting down massive token expenses, ensuring privacy and data security

'Solar-Smol-VLM'-0.5B
Drone based Solar inspection

'Solar-Smol-VLM-0.5B'
Drone based Solar inspection

FF-doc-4b
Freight Forwarding Docs Intelligence Model

100%
Local intelligence, on premise, with your own data

~80%
Reduction in processing cost with SLMs (FFDoc benchmark)

90%+
Accuracy on doc processing tasks (FFDoc benchmark)

THE SOLUTION

A specialized Small Model for Freight Forwarding doc processing

01 **GOLDEN DATASET**
Created a golden dataset for FF Docs across 12 classes

02 **SYENTHETIC DATA PIPELINE**
Automated synthetic data generation pipeline

03 **MODEL TRAINING & FINE TUNING**
Model post training, retraining cycles with data curation

04 **ON PREMISE/HOSTED API OPTIONS**
Hosted API sandbox for trials, fully local on-premise setup ready

WHY IT MATTERS

Performance: Specialized not Generalized, higher Domain accuracy
Efficiency: Much lower inference cost, zero token subscription burden
Control: Enterprise Data Sovereignty, control on privacy & security

HOW IT WORKS

1 **SLM API CALL**
Doc upload

2 **CLASSIFY**
Classify Docs

3 **SPLIT**
Split Multi Doc Types

4 **EXTRACT**
JSON output with Data

DIFFERENTIATED CAPABILITIES

• Deeply routed in Ground truth • Enterprise specific Learning/Relearning • Fully Local with Data Privacy & Security • Enterprise Control & Governance • Massive Cost Savings with Token Elimination

FACTORYSIGHT

Activating a second brain for field engineers.

VOICE • VISUAL • TEXT

A sovereign co-pilot that remembers every machine

Voice, photo or text answers from 500-page manuals in seconds, with citations.

10,000
baby boomers retire every day

70%
of critical know-how is undocumented

$1.4T
yearly cost of unplanned downtime

THE SOLUTION

A multimodal co-pilot that runs on the edge

01 **EQUIPMENT MEMORY**
Every diagnosis and repair, stored per machine

02 **MULTIMODAL QUERY**
Voice, image or text, answered with citations

03 **PERSISTENT MACHINE HISTORY**
Cross-shift memory with pattern detection

04 **SOVEREIGN EDGE**
Local LLM, zero cloud, air-gap capable

BUSINESS OUTCOME

$47M/yr knowledge-transfer loss avoided, lower MTTR and junior techs productive from Day 1.

ONE INTERFACE. ANY MODALITY. FULL SOVEREIGNTY.

HOW IT WORKS

1 **SCAN** Equipment QR
2 **CAPTURE** Photo or voice
3 **DIAGNOSE** Cited visual RAG
4 **LOG** Auto repair log

DIFFERENTIATED CAPABILITIES

• **Hands-free voice** • **Visual matching** • **Smart logging** • **Cited sources** • **Air-gap ready** • **A knowledge flywheel that gets smarter daily.**

TRUST AI

Making AI decisions measurable, explainable, and audit-ready.

RESPONSIBLE • PERFORMANCE • REASONING

One framework to trust every agent decision.

Evaluate, validate and govern every agent response, then prove it with explainable scores.

12 EVALUATION TOOLKITS

Hallucination	Content Moderation	Context Recall
Faithfulness	Answer Relevance	Usefulness
Explainability	Jailbreak	Prompt Injection
Bias	Fairness	PII Detection

12
Specialized evaluation toolkits

3
Trust dimensions across every agent

8
Supporting methodology

** As compared with frontier model

THE SOLUTION

An evidence-first trust framework for enterprise AI agents

01 **RESPONSIBLE AI**
Bias, safety and regulatory compliance checks

02 **PERFORMANCE AI**
Accuracy, hallucination, latency and cost

03 **REASONING AI**
Logical steps, consistency and explainability

04 **AUDIT-READY EVIDENCE**
Scored, explainable and traceable results

LIVE TODAY

A 12-dimension trust profile and overall trust score for every agent response.

HOW IT WORKS

1 **INTAKE** Agent response › 2 **EVALUATE** 12 toolkits › 3 **SCORE** Multi-judge rubric › 4 **EXPLAIN** Evidence trail › 5 **GOVERN** Audit-ready score

DIFFERENTIATED CAPABILITIES

• Multi-judge rubric scoring • Per-claim hallucination grounding • Counterfactual bias testing • Injection and jailbreak defence • PII detection

Company Confidential © Capgemini Invent 2026. All rights reserved |

ROUTE IQ

Routing every AI workload to the right model.

CAPABILITY • COST • LATENCY

One decision layer for every model choice

An intelligent AI orchestration layer that dynamically selects and routes workloads to the most appropriate models based on capability, quality, cost, latency, execution context, and business priorities, enabling organizations to optimize performance, control AI spend, and deliver consistent outcomes at scale.

SIX ROUTING DECISIONS

Gateway	Provider	Policy
Model	Agent step	Placement

~23%**
Higher answer quality

~63%**
Lower cost

~10%**
faster per call

THE SOLUTION

Six routing decisions, one explainable choice

01 **ALL SIX DECISIONS, ONE LAYER**
Gateway, provider, policy, model, agent-step and placement behind one endpoint

02 **DETERMINISTIC FIRST**
Hard filters run first. Prediction is used only where difficulty varies

03 **PROVEN CAPABILITY**
Best-fit model chosen from evaluated performance, not keywords

04 **EXPLAINABLE EVERY TIME**
Each choice records model, provider, confidence and signals

CLOSED LOOP

Outcomes retrain a versioned router. Value is tracked as cost per accepted task.

HOW IT WORKS

1 **CLASSIFY** Task and domain › 2 **BENCHMARK** Live model data › 3 **PICK** Best-fit model › 4 **SWITCH** Safe switching › 5 **LEARN** Feedback loop

DIFFERENTIATED CAPABILITIES

• Complexity and domain classification • Realtime model benchmarking • Net Switch Score validation • Mid-task model switching • Quality feedback loop

AGENTIC WORKBENCH 2.0

Building trustworthy, enterprise grade multi-agentic workflows.

BUILD • ORCHESTRATE • GOVERN

Democratize AI. From natural language to autonomous workflows.

Empower business users to design complex, multi-agent systems in minutes. Then execute and monitor them with enterprise-grade security and complete observability.

80%
Faster time to Value. Design and deploy multi agent workflows in minutes.

9+
LLMs - Deploy frontier models or self hosted sovereign models.

11
Trust KPIs per Agent. Move from black box automation to complete transparency.

THE SOLUTION

A governed workspace for autonomous Agentic AI

01 **INTELLIGENT DESIGN**
Visual Workflow Studio with AI Companion. Auto-detects chat patterns and generates workflows.

02 **SOVEREIGN & FLEXIBLE**
Choose from 9+ LLMs, including self-hosted open-weight models.

03 **TRUST & OBSERVABILITY**
Agentic Ops tracks 11 Trust KPIs (Hallucination, Bias, Moderation) and token consumption per run.

04 **WORKCLAW INTEGRATION**
Conversational AI workspace powered by Claude for autonomous task execution.

LIVE TODAY

Reduced workflow creation time by 80% • Zero marginal cost with Sovereign Models • Library of 100+ pre-built Agents

HOW IT WORKS

1 **COMPOSE** Drag Agents › 2 **CONNECT** Tools & MCP › 3 **ORCHESTRATE** Auto-pattern › 4 **EXECUTE** Workflow Studio › 5 **OBSERVE** Trust AI & Ops

DIFFERENTIATED CAPABILITIES

• Enterprise SSO & RBAC • MCP Connectors • Dual LLM execution • Prompt optimization via AI • Trust AI scoring for every agent • Native PowerPoint/Excel generation
